

Perfect Stranger Press:

Perfect Stranger is a stage name for Israeli based electronic musician Yuli Fershtat. Perfect Stranger was created around February 2005, and within 2 calendar years became critically acclaimed all over the globe, always showcasing the next step with his multi genre psychedelic dance music, and ultimately culminated being a genre of it's own, presenting a totally distinctive sound, characterized by groovy playful beats and patiently built compositions. His music often defies genres bridging between progressive trance and techno with a presence of tribal and psychedelic elements. Perfect Stranger is successfully performing over and over at the most desirable festivals on the planet such as Boom (Portugal 2008, 2012, 2014), Rainbow Serpent (Australia 2009, 2011, 2015), Eclipse Festival (Australia 2012), Symbiosis Gathering (USA 2009, 2012, 2013), Universo Paralello (Brazil 2006, 2007, 2008, 2009, 2010, 2013), Glade Festival (UK 2008, 2009), Antaris Festival (Germany 2010, 2012), Ozora Festival (Hungary 2012), Strawberry Fields Festival (Australia 2011, 2012), S.U.N Festival (Hungary 2013, 2014), Shambhala Festival (Canada 2013), Subsonic Music Festival (Australia 2011, 2013), Motion Notion Festival (Canada 2012), Harvest Festival (Canada 2011), Sunburn Festival (India 2011), Eclipse Festival (Canada 2010) and the list goes on and on.

Perfect Stranger released 3 full artist albums, 2 remixes albums, compiled 2 compilations and appears on well over a hundred other releases (compilations, EP's, albums etc). He also owns the "Digital Structures" label, where he publishes more Tech orientated sounds.

<http://www.beatport.com/label/digital-structures/1455>

After his epic "Free Cloud" album released on Iboga Records 2008 one of the critics wrote:

"A generic label would not do justice to the depth of Perfect Stranger's heartfelt music, which transposes feelings from across the wide range of human emotions. In his creation, you'll find tracks inspired by the bliss of sunbeams, by an ironic but yet candid take on the simple pleasures of life, or by the darker side of the self.

His demanding standards regarding what our man qualifies as the "art" of sound, have led him to appropriate today's trend, undoubtedly Techno, which he also DJ's with a rare understanding and acute intelligence. His "new hybrid sound", that incorporates Progressive Trance embedded in the dirty Techno-ish grooves and breakdowns, actually enables to maintain that old school spirit that is missed so much nowadays, but in a totally new and exciting presentation and composition. That is why it's the ultimate brain candy out there at the moment."
