

Perfect Stranger Technical Rider 2015

Space* near DJ mixer ***Pioneer DJM 900 Nexus*** or ***higher*** , with the USB input free and WORKING on the Mixer.

* Space - Should be 1.5 meter wide and 1 meter deep, of a reasonable height (not less than 120cm), to ensure that all the equipment could be placed in that space, to get the best work environment on stage.

At least 1 decent working monitor speaker available on stage.

3 electricity slots with stable current should be available as close to the mentioned above space to plug the equipment.

2 *CDJ Pioneer 2000* or *900 Nexus***

Decent and dimmed lighting on the DJ table, to be able to see the knobs of the mixer properly.
